Protegent Enterprise Security (PES) - Activity Reporter

Protegent Enterprise Security-Activity Reporter is a robust and complete security solution for data security. It comes with,

- **Activity Reporter**
- **Protegent Management Console**

Unistal's Protegent Enterprise Security-Activity Reporter (with Hybrid Network Support) offers cogent approach in order to monitor all the real-time client machine activity on managed endpoints with Windows Operating System. This helps to monitor your network client machines in an efficient manner by providing total monitoring over Application and Web activities. It is equipped with advanced Management System that provides highly advanced features to manage, monitor and secure endpoints accessing the corporate network. Its monitoring modules provide detailed information of all the activities performed on a client machine to ensure advanced level of security. Protegent Enterprise Security-Activity Reporter is developed with an aim to provide high-level security for SMEs and large enterprises.

The Protegent Management Console provides a single administrator screen to deploy, manage & control the features, settings and access user reports and alerts on any unauthorized usage of Protegent Enterprise Security-Activity Reporter. It reduces the administrative workload by centralizing all management activities for "**Activity Reporter**".

Protegent Management Console Features

Manageability	• Remotely deploy, manage and uninstall Activity Reporter on users • Identification of non-compliant systems • Backup option for settings, reporting, network structure and license to restore for later use • Optimized for Business Environments • Through package, manual installation is possible (when deployment failed) • Automated upgrade

Settings	• Arrange users in groups as per usage, department or policy based structure • Create settings specific to an user or group • Overwrite or append settings as per requirements
Reports	• Detailed reports of each user • Send reports to FTP • Extensive queries & search reports • Centralized reports for all users or specific user
