Cloud protection will ensure real time update of threat database which in turn provide maximum protection and improve performance of your PC.

Antivirus and Antispyware

Protegent Total Security safeguards your system against Viruses, Trojans, Spywares, Rootkit, Malware attacks and other online threats.

Antiphishing

Blocks all web pages which support virus scams and personal data phishing attempts.

Active virus control

Real time protection is an important feature offered by Protegent **Total Security** Solution. This feature continuously monitors the applications running on computer, looking for malware-like other threats to provide maximum protection.

Web Control

Uncontrolled web activity can lead to virus infections and impact productivity, delivers web-filtering capabilities to have a control over what users are doing online and the applications they are using so as to prevent the dangers that can lead to data breaches and other harmful consequences.

PROTEGENT Total Security 1 PC/1 YR

Setting Protection

This feature helps you save and privatize your settings using a password. This in turn prevents further modifications even if the other user has admin rights.

One Click Removable Device Scan

This feature instantly monitors your USB as soon as you plug it in your system.

Hourly Update

Protegent **Total Security** Module takes update every hour which ensures the maximum protection for your system from new viruses.

Antispam

Antispam feature helps you remove unwanted emails before you download them to your computer. This feature instantly filters out messages that seem suspicious. The “weeding out” process makes sure that spam does not gets anywhere inside your mail box. Having Protegent **Total Security** software’s Antispam protection helps assure that you and your employees do not accidentally open any unfamiliar communication that infects your entire network.

PROTEGENT Total Security 1 PC/1 YR

Two-way Firewall

which not only prevents hackers from accessing your computer but also malicious programs from retrieving sensitive information without user's permission. With this software's double control, any form of unauthorized activity is impossible. Special shields prevent intrusions from local net and Wi-Fi net. Placing itself in the firing line, the bidirectional firewall keeps your PC stay safe & away from the hacker and malware, leaving you calm and relaxed while using your computer and Internet.

Block Ads and Website

Pop up ads and insecure websites are a result of your computer being infected by Adware or Spyware. The highly advanced feature of even blocks the scam websites which gives you the option to continue further or not.

Personal Data Filter

Protegent **Total Security** software's strength lies in proactive detection of known and unknown threats by means of complex definitions of malicious behavior by using Smart Code Emulation signatures & neural networks. This smart feature constantly detects the latest threats and protects your system from them.

PROTEGENT Total Security 1 PC/1 YR

Anti-Ads Protection

Anti-ads protection feature removes and blocks all the harmful ads before data is downloaded to your computer.
